

# Ethnic Food Options at Lehigh University

Almost half of the overall population of students that we surveyed feel that there are sufficient ethnic food options both on an off campus. The remaining respondents' opinions were evenly split between feeling that there were only enough options off campus, and that there needs to be more.

While overall students felt that there were sufficient ethnic options (see previous chart), this graph reveals that those who feel there are enough options both on and off campus are mostly Caucasian, and the African, Asian, and Latino/Hispanic populations of Lehigh tend to feel that there are not enough ethnic options at Lehigh.

Based on this graph, the largest populations of U.S. residents feel that there are enough opt..

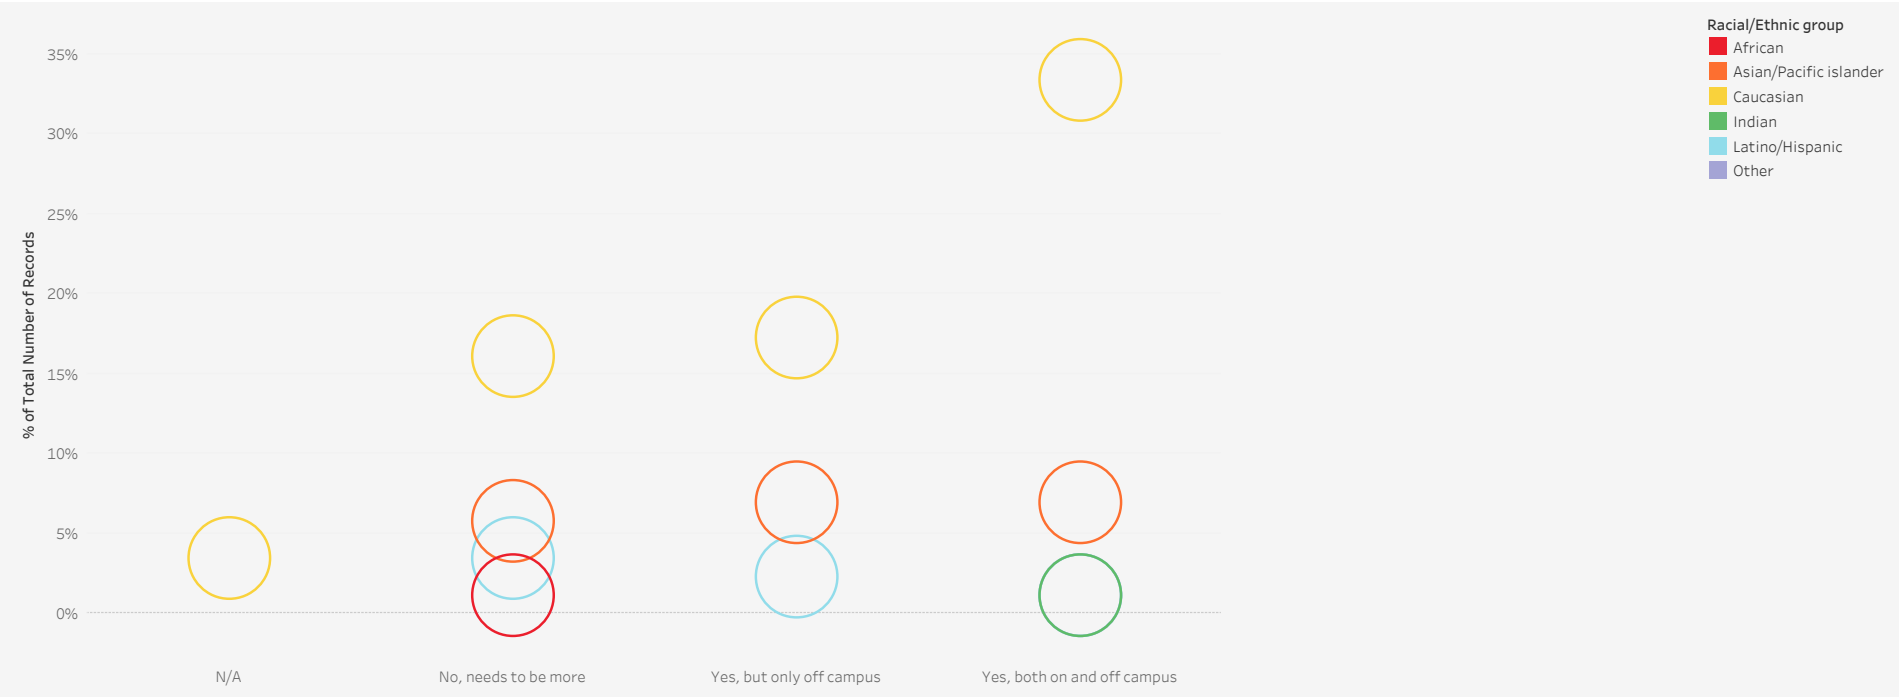

# Ethnic Food Options at Lehigh University

Almost half of the overall population of students that we surveyed feel that there are sufficient ethnic food options both on an off campus. The remaining respondents' opinions were evenly split between feeling that there were only enough options off campus, and that there needs to be more.

While overall students felt that there were sufficient ethnic options (see previous chart), this graph reveals that those who feel there are enough options both on and off campus are mostly Caucasian, and the African, Asian, and Latino/Hispanic populations of Lehigh tend to feel that there are not enough ethnic options at Lehigh.

Based on this graph, the largest populations of U.S. residents feel that there are enough options, and this opinion is localized to the East coast. However, responses that are more distributed across the country are less satisfied with the diversity of food at Lehigh.

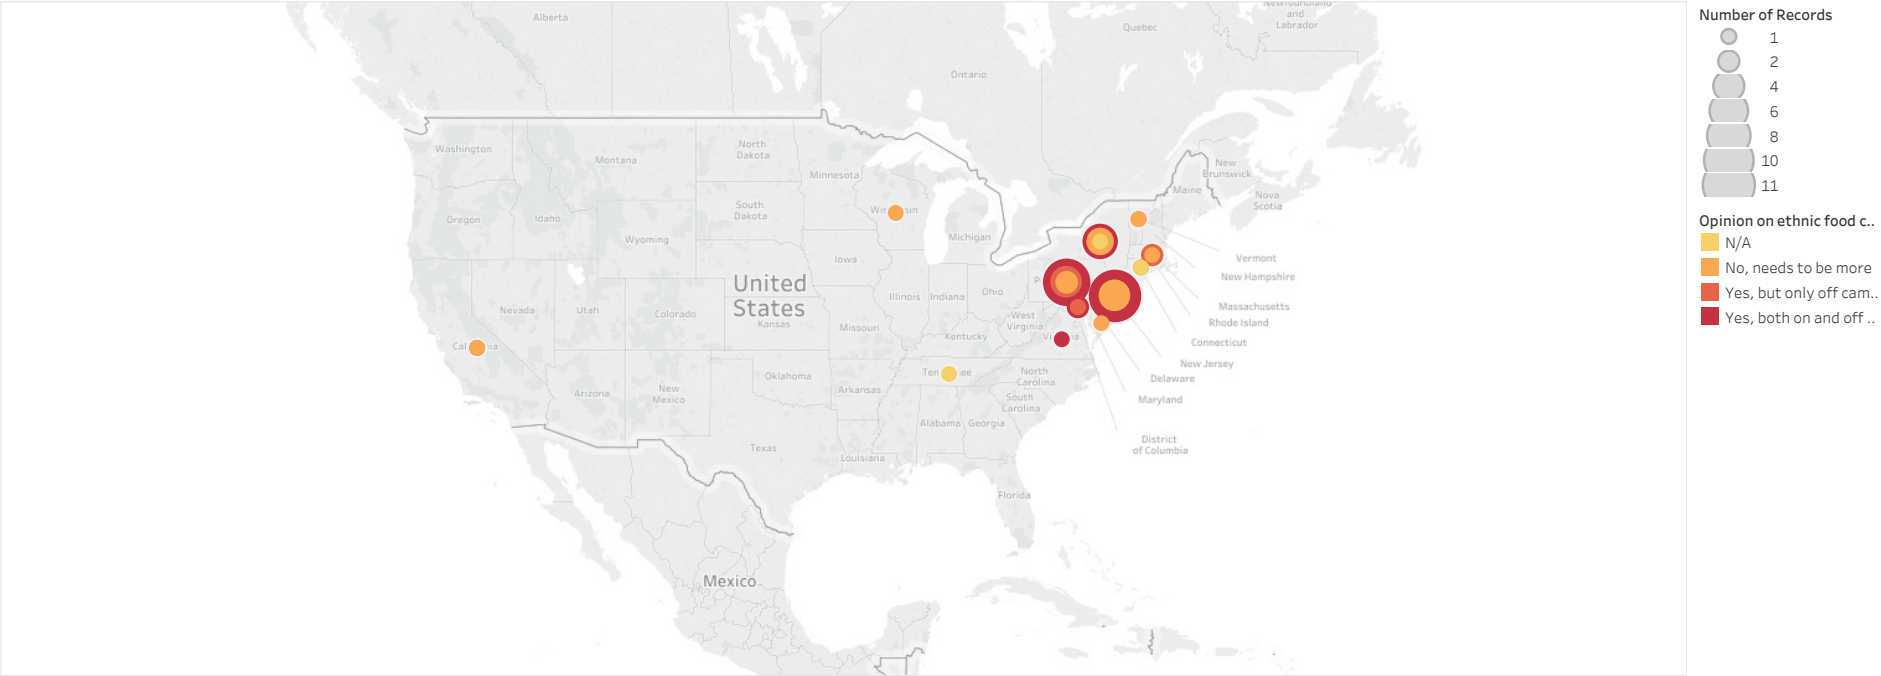

# Ethnic Food Options at Lehigh University

While overall students felt that there were sufficient ethnic options (see previous chart), this graph reveals that those who feel there are enough options both on and off campus are mostly Caucasian, and the African, Asian, and Latino/Hispanic populations of Lehigh tend to feel that there are not enough ethnic options at Lehigh.

Based on this graph, the largest populations of U.S. residents feel that there are enough options, and this opinion is localized to the East coast. However, responses that are more distributed across the country are less satisfied with the diversity of food at Lehigh.

Even those who are from countries outside the U.S. tend to feel that there are enough ethnic options at Lehigh, with the exception of the response from China, which states that there needs to be more ethnic options.
